

DoseLoop test badges: shift 1 (Safe)

Print at 100% / Actual size on plain A4 paper. Demo data, lab validation pending.

1 Shift START (new pod, 0 ppm·hr)

2 Shift END (pod at 20 ppm·hr)

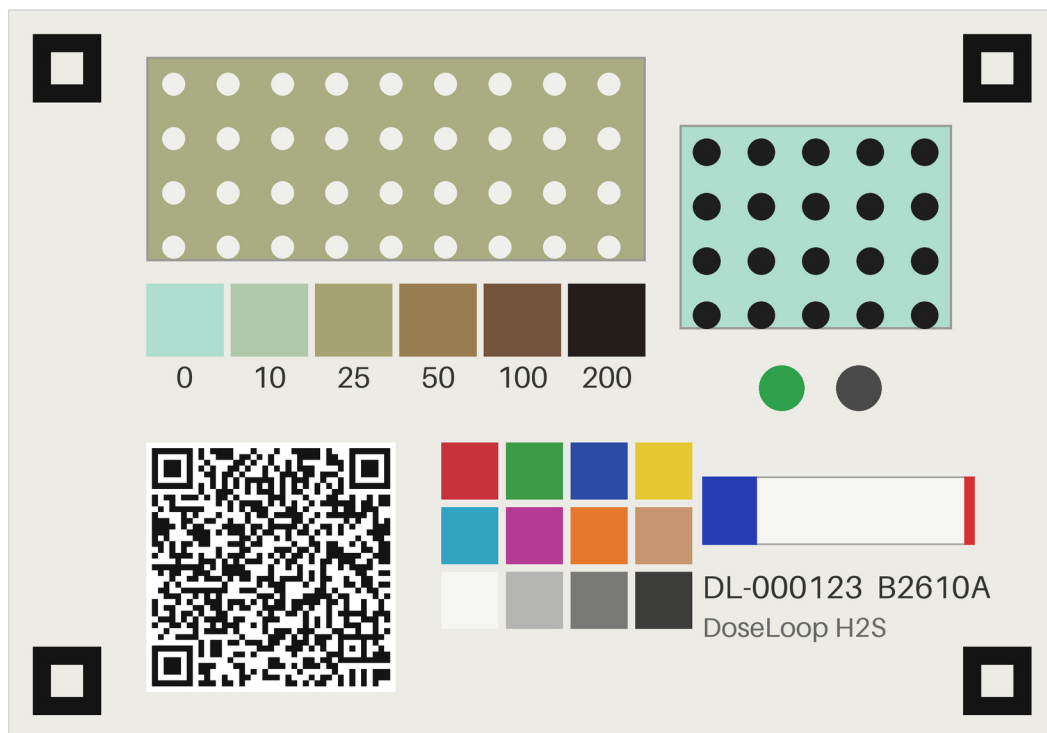

Expected: about 20 ppm·hr this shift, Safe. Scan 1 as Start shift, then 2 as End shift.

DoseLoop app: Scan > Camera, then hold the badge flat in front of the camera. It captures by itself.

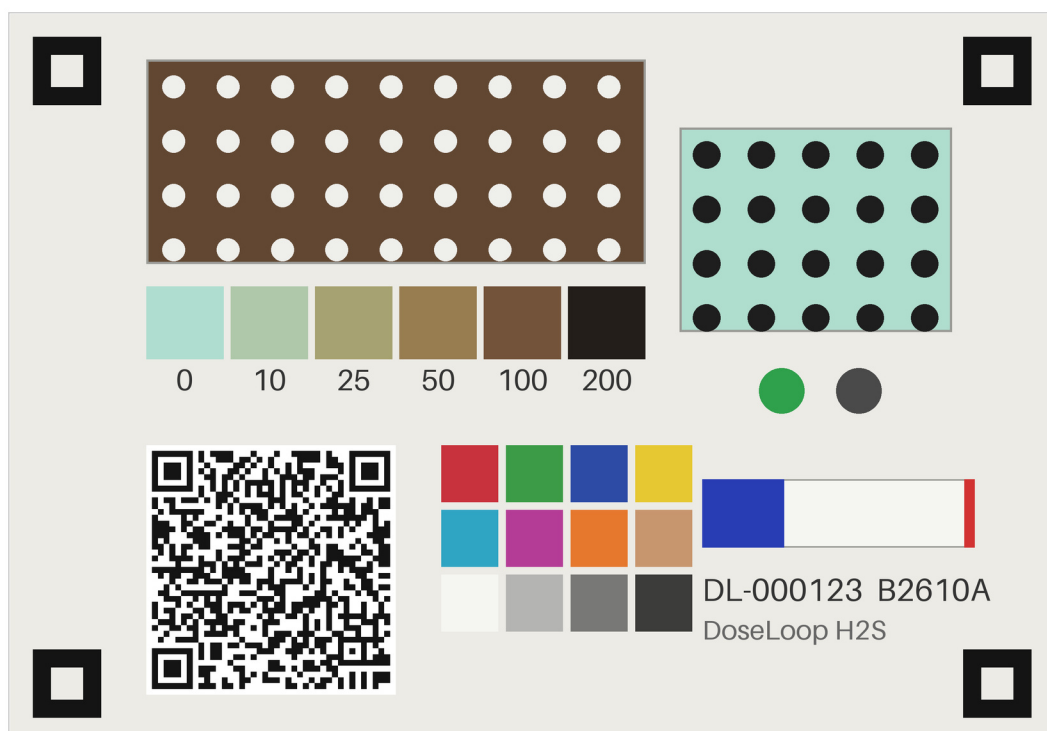

DoseLoop test badges: shift 2 (Over limit)

Print at 100% / Actual size on plain A4 paper. Demo data, lab validation pending.

3 Shift START (same pod, still 20 ppm·hr)

4 Shift END (pod at 120 ppm·hr)

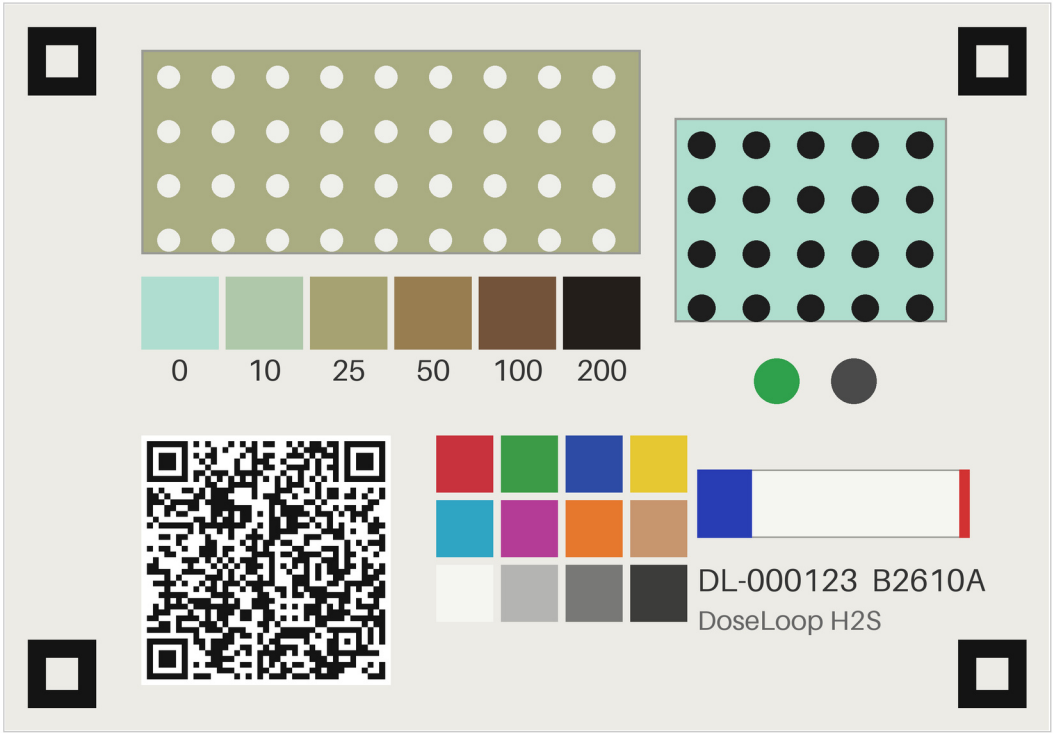

Expected: about 100 to 115 ppm·hr this shift, Over limit (80). Scan page 1 first, then 3 as Start, 4 as End.

DoseLoop app: Scan > Camera, then hold the badge flat in front of the camera. It captures by itself.

DoseLoop test badges: shift 3 (must be rejected)

Print at 100% / Actual size on plain A4 paper. Demo data, lab validation pending.

5 Copied pod (fake signature)

Expected: 'Fake pod' error, nothing logged. The QR signature was not made by the pod maker.

DoseLoop app: Scan > Camera, then hold the badge flat in front of the camera. It captures by itself.
